This Office Action is in response to the papers filed on November 14, 2003.

Dependent claim 2 is objected to because "the first channel region" (line 2) lacks antecedent basis (such should read "the first channel regions").

Dependent claim 4 is objected to because "a fourth step of performing, after the second step," is incorrect (such should read "a fourth step of performing, after the third step," – see the specification at page 15, line 10, through page 16, line 20).

Claims 1 and 3 are allowable over the prior art of record.

The prior art of record does not disclose or suggest the allowable solid state imaging device taken as a whole, including the second channel region having an impurity concentration lower than that of the first channel regions.

United States Patent 5,635,738 to Shoda et al. is relevant to this application.

United States Patent Application Publication 2004/0105023 to Okada is related to this application.

This application is apparently in condition for allowance except for the above formal matters.
